3rd Annual Move to a Better Place

AboveNet Metro Gig-E™ Service Promotion

Let your business soar

It's amazing what happens when you set your business free with an all-optical direct connection between your LAN and the Internet. Bypass the surly bonds of rate-limited, local loop circuits and experience the freedom of bandwidth on-demand. If you want your business to soar, AboveNet can help. Let nothing come between your business and the world except an AboveNet strand of glass.

AboveNet Metro Gig-E Service

AboveNet bundles its tier 1 global IP backbone with metro fiber to create a high capacity, plug-n-play IP service over familiar Ethernet technology. Get superior Internet connectivity over secure, private metropolitan fiber that carries only your traffic. No local loop charges, no complex protocol conversions, no additional points of failure and latency introduced by central office switching. AboveNet Metro Gig-E service is direct, simple, secure, reliable, and all-optical in a single convenient package.

Bundle prices start at $5,000/month and include the following service features:

- Gigabit Ethernet and TCP/IP only
- Dedicated 1,000 Mbps optical connection over private fiber (unprotected)
- First100 Mbps of AboveNet IP bandwidth each month included in bundle price
- On-demand bandwidth to 1,000 Mbps (no additional provisioning)
- Usage-based billing for bursts
- 24x7 NOC support
- Fast provisioning for on-network locations

Bundle prices do not include installation, set-up, and network lateral construction costs (when applicable). Customer-owned equipment is managed by customer at customer premises. Customer must meet AboveNet at the common network demarcation point of building or other location designated by AboveNet.

AboveNet Metro Gig-E service bundles are offered in the following markets, subject to port and fiber availability:

- Atlanta
- Dallas
- Los Angeles
- San Francisco Bay Area
- Washington, D.C.
- Chicago
- Houston
- New York
- Seattle

AboveNet IP Bandwidth Flexibility

If your bandwidth requirements exceed the 100 Mbps/month already included with AboveNet Metro Gig-E service, use what you need and pay only for what you use. Bursting by 1 Mbps, means you pay for only 1 additional Mbps. Burst bandwidth for AboveNet Metro Gig-E starts at just $50 per Mbps. Your rate may be lower based on volume commitments.

AboveNet Managed Service Options

With AboveNet Metro Gig-E service, a broad portfolio of managed services options become available from AboveNet at your location, including:
